Online Workshop
‘Sampling Protocol to Study the Health and Environmental Impact of Informal Use of Wastewater and Faecal Sludge in Agriculture’

Organized by National Institute of Urban Affairs (NIUA), Biome Solutions, LEDeG and BORDA

30th August 2021

About the workshop
NIUA along with BIOME and its consortium partners i.e. BORDA and Ladakh Ecological Development Group (LEDeg) is conducting research on 'Health and Environmental Impact of Informal Use of Wastewater and Faecal Sludge in Agriculture'. The outcome of the research is to identify and provide recommendations to inform and strengthen existing standards, protocols at National level. In this regard a consultative workshop with eminent epidemiologists and health experts was held. The aim of the workshop was to validate the criteria and selection of parameters, testing protocol and associated logistics and finalise the parameters and methodology to be adopted in the study. Enriching points were raised in the deliberation on testing protocols and other parameters aiming towards a systematic and qualitative research.
